March Program – Tracking Native Wildlife

Rick Botta, one of the founding members of both the Los Peñasquitos Tracking Team and the San Diego tracking team, spoke to us about animal tracking in San Diego and the Torrey Pines area.

The San Diego Tracking Team is using track and sign data in its habitat preservation efforts throughout the county. The tracking team monitors wildlife corridors and carefully records observations. Survey leaders are held to high standards and enter their accurate information into a data base. These field observations, coupled with remote camera feedback, influence planning decisions to preserve wildlife corridors. To learn more about tracking and the San Diego Tracking Team, go to www.sdtt.org.

Photo by Herb Knufken

Rick told us that, "San Diego County is home to a large number of mammal species that often elude us during our outdoor activities. The presence of an animal, though, is evident through signs it leaves behind.” He presented an introduction to animal track and sign identification for some of the common mammals in our area. We learned how to differentiate tracks of various mammal families as well as species within a family; some non-mammal animals were also covered.

Docent Doings

Apr. 6, Crystal Cove fieldtrip
Apr. 9, General meeting
Apr. 16, Earth Day
May 15, Second Annual Art in the Pines Festival
Sep. 10-13, Channel Islands trip
Mondays, 8:30-10 am- Weeder
Tuesdays, 8:30-noon- Seabees

Send future event info to editors@torreypine.org.

March 2011 Docent Meeting Notes

Excerpted from notes from of TPDS Mar. 12th General Meeting, by Secretary Bill Eckles. Complete minutes in docent library.

President Ken King called the meeting to order at 10:35 am following a presentation by Rick Botta of the San Diego Tracking Team on "Tracking Native Wildlife." This had preceded the normal break for refreshments and chit chat with friends.

This month's Docent of the Month is Ann Heinemann, a member of the Class of 2006 who is a real stalwart in hosting the Lodge. She posted 94 hours in 2010 and has already registered 39 hours this year. Thank you, Ann! (see photo next page)
Past President **Rick Vogel** announced Park Advocacy Day would be March 22 in Sacramento. He plans on attending. On April 22, Johnson and Johnson, Co. R&D will celebrate "Earth Day" and Rick requested another docent beside himself to attend this function. California League of Park Associations (CALPA) will be meeting the weekend of Art in the Pines in Mendocino. They have requested to meet here in San Diego next year and Rick requested docent support to help with arrangements for this meeting. Please contact Rick with offers of assistance.

**President's Announcements:** (Ken King) The “Nature Bucks” program has used its initial supply of certificates with only limited success and will be discontinued for the foreseeable future. However, in times of high visitor volume at the entrance kiosk, Ken suggested docents could help the ranger staff by distributing maps and correspondence while visitors are waiting for park entry. This must be done on an *ad hoc* basis as crowds are not that predictable. Any support will be appreciated.

**Treasurer's Report:** (Mike Yang) February continues very strong in the Museum Shop for the month. Special Walks made another large contribution to revenues as did membership dues. Net inflow is significant and increased over last year.

**Torrey Pines Association:** (Pat Masters) Pat described a bit of the history and role of TPA in our operation.

**Diane Greening** announced that Earth Day will be celebrated April 16 and docents should meet at the North Beach parking lot at 8:30 am for work on weeding, pruning and fence repair. Please sign up on line at [Calparks.org](http://Calparks.org).

**Art in the Pines:** (Connie Beardsley) We expect 45 booths this year and the art will be of high quality. She requested recommendations for sources of additional appropriate music providers.

**Bonnie Hornbeck** requested additional recipes for the docent recipe book. We need at least 50 and have about 35 so far.

**Chuck Anders** requested assistance getting the coffee supplies to St. Peter's Church for General Meetings.

**Frank Burham** announced the Science Fair judging will occur on March 23 at Balboa Park. We will have winner presentations at May 14 meeting, as schedules permit.

**Children's Program:** (Sue Randerson) Sue reminded us that docents wanting to learn to help the Children's Program are welcome to just tag along at will. No reservations are necessary. Kumeyaay culture is the most popular subject this year.

**Communications:** (Lou Adamo) Several docents have failed to provide email addresses as requested to join "Google Groups." Lou will help those needing it. Tsunami postings can be seen at the "Winds and Waves" heading on the torreypine.org homepage. Regarding Art in the Pines, **Bob Doolittle** is coordinating volunteers for traffic control and van movement.

**Tom Polakiewicz** announced the upcoming Channel Island trip was a good value at $610 for the three night tour. He encourages docent participation and will make spaces remaining after docent selection available to members of other, compatible groups at the same rate.

**Whacky Weeder:** (Steve Tarkington) Steve welcomed the new class of docent trainees and introduced them to the weeder group. In addition to helping restore natural vegetation, the WWs are recruiting members to join them at 8:30 am Mondays.

**Seabees:** (Frank Burham for Sheldon Krueger) Short posts and rebar "reminders" encourage staying on trail. The group meets at 8:30 am Tuesdays at the Lodge. Frank thanked **Ernesto Frezquez** who, after working as a volunteer for over a year, is now in the process of becoming a docent.

**Memberships:** (Carol Smith) Memberships are in good shape and, hence, the current roster is available some three months early. Thank you. Carol.

**Recycling:** (Bob Doolittle) The recycling program has a new, clean shed and is readying for summer activities.

Ken adjourned the meeting at 11:20 am.

**Children's Program**

Thanks to all docents who have signed up in advance to help with the Children's program in April and May. These last two months of our program walk leaders are especially needed, as many of our docents go on...
vacation in the spring. If you have been thinking of participating in the Children's program, now is a wonderful time to come out, with more and more flowers blooming every week. Come and join us on a Thursday or Friday — we would love to see you!

We also hope to reschedule on other dates the two classes that had to be cancelled on March 11th when the Reserve was closed because of the tsunami warning. Check the schedule in the Library or on the Children's Program signup online.

On that Friday I learned the value of checking my computer before coming to volunteer: I was so caught up in the news about the earthquake and tsunami in Japan that I forgot to turn it on, and I missed Laura's email at 7:30 am that the program would be cancelled. She followed up with a call, but I had left early because of traffic. What a surprise to be turned away at the gate! In the future I will check my computer for any cancellations or schedule changes, and I will take Laura's phone number with me. Fortunately, I had the Lodge number.

Since I was there right when the tsunami was expected to arrive, I pulled over with all the other cars and watched for it. Some people monitoring the sea level (it was right at the low tide) noticed some changes. Others saw a little surge at the lagoon opening. I didn't see much. But on my way home I stopped at San Diego Bay and there on the shore, though the tide was coming in, I saw the water slowly advance and then recede about 1 1/2 feet, all in the space of about 15 minutes. A woman who was there before me said it had happened several times…rising to float a rowboat tied up there, then receding and advancing again.

On March 13, we invited members of the San Diego Women's Foundation for a walk to thank them for their generous $33,900 grant to the Children's program. About 22 enthusiastic women showed up at 4 pm that Sunday. Laura, Diane Greening, Barbara Wallach and I led active, moderate and easy walks. Most of them chose the active walks! Many thanks to Diane Greening for her work in organizing the walk, setting up the display boards with thank you's from the children, and especially for administering the grant.

On Thursday, March 17, a member of the SD Women's Foundation filmed a visit by Chollas Mead Elementary School to show at their annual meeting. Chollas Mead is a Title One school and received one of the docent's bus grants. She filmed Diane Greening's presentation on the Kumeyaay and children visiting the museum, grinding acorns, and learning about the plants around the museum. She was very impressed with our program and how much the children seemed to enjoy it.

**Art in the Pines 2011**

**Sunday, May 15, 10 am to 5 pm**

Our Second Annual Art in the Pines Spring Art Festival and Sale to benefit Torrey Pines State Natural Reserve’s nature education programs for school children is fast approaching. Artwork for sale, guided tours, children's activities, live demonstrations, food and live music all promise to make this a memorable day.

**Cindy Wollaeger and Janice Barnard** are this year's co-chairs of “Art in the Pines 2011” committee.

**Suzan Potuznik** has lined up over over 70 artists who will either participate in the Plein Air competition, or submit artwork for the Open Air Gallery, or have their own art booth. **Bob Doolittle** is coordinating the layout of the festival site and all the directional signs needed. Watch for the banners that Bob is installing at various locations around the Reserve. **Lou Adamo** is in charge of the shuttle service. A free shuttle will take visitors to and from the South and North Beach parking lot. Guests will be strongly encouraged to consider walking to the event instead of waiting for the shuttle. Additional parking will be available for no charge at National University located just south of the Reserve at 11255 North Torrey Pines Road La Jolla, CA 92037. Docents and volunteers are requested to park (for free) at the National University parking lot. From there, it is a level 10 minute walk to the event.

**Judith Zyskind** is very busy lining up docent volunteers for the event. If you have not yet volunteered for one of the many tasks that make this event a success, contact her now! jzyskind@sciences.sdsu.edu

Five-thousand bookmarks have been given out as a promotion to the event and more were ordered. An email “flyer” has been sent to all docents. You are encouraged to forward this email on to friends and family and...
2011 Docent Trainees Demonstrate Determination and Enthusiasm

Photos and article by Janie Killermann

The Docent Class of 2011 is made up of 32 enthusiastic individuals who are enjoying the challenge of the training curriculum and the many features and faces of the Reserve.

Topics addressed at the Saturday training sessions so far have included Geology with Dr. Keith Meldahl, Plants with Margaret Fillius, and Birds with Jack Friery. Recent graduates of the Docent Class of 2010 have unfailingly provided tasty refreshments at break time, and trail walks lead by volunteer docents have proven a highlight for trainees who can see, smell, touch and hear features of the Reserve described in the lecture series.

Upcoming lectures will focus on the Kumeyaay with Kathy Dickey and the History of Torrey Pines State Natural Reserve with Judy Schulman. Current docents are welcome to join training sessions and to be leaders of trail walks. Contact Training Coordinators Janie Killermann or Linda Zlotnik for details.

Earth Day April 16th

by Diane Greening

The two major projects will be improving the North Beach lot and weeding along Carmel Valley Road. We’ll need docents who are able to identify native and invasive plants to lead teams of ten to prune and weed along the sidewalk and in the islands, and to lead groups in weeding along Carmel Valley Road. The Seabees will direct a project to replace the rope along the sidewalk. Docents are needed to help set up, lead work parties, or just participate. Meet at the North Beach parking lot: set up starts at 8 am, check in at 8:30, work from 9-noon. Please sign up in advance online at Calparks.org and let Diane dgreening@parks.ca.gov or Laura llowenstein@parks.ca.gov know if you can lead a work group.

Park Advocacy Day

by Rick Vogel

Every year since 2003, the California State Parks Foundation sponsors Park Advocacy Day (PAD), during which 150-200 volunteers from around the State converge on Sacramento to talk to legislators about Park Issues. The 2011 PAD was held on Tuesday, March 22nd and rated by many as a resounding success.

With the failure of Prop 21, and the Governor’s new budget, the State Parks system has never been in more
need of the Parks community’s help. Governor Brown’s budget mandates an $11 million cut in funding from the State’s General Fund for the 2011/2012 fiscal year, growing to $22 million cut in 2012/2013. Since these reductions come from a parks budget that is already inadequate to maintain operations at all parks, there will be permanent park closures. While everyone admits that the closures will happen, the Governor has not yet released the list of parks to be closed. We have to remember that the System has been suffering partial and/or temporary closures at as many as 150 parks statewide (Has anyone been out to Cuyamaca on a weekday?). The above assumes that a series of tax increases that are scheduled to expire at the end of 2011 will be extended. If that doesn’t happen, there will be more cuts and more closures in July. PAD volunteers have asked that the legislature press the Governor to release the closure list, and implored everyone in Sacramento to stop any further cuts in Park funds.

There were also several Park protection proposals and options to keep the Parks open before the legislature. We spoke with legislators about the bills upon which the Parks has recommended action. For information on the bills, do Google searches on SB580, AB1077, AB42, AB64 or AB587, with CA, for example, “CA SB580.”

One final item we discussed with legislators was the recently published “A Vision for Excellence for California’s State Parks.” After many surveys, interviews and other research, CSPF has produced this report on the vision for the State Parks and how to achieve that vision. CSPF has provided a copy of the report to each legislator’s office. In addition to providing the vision and several admirable goals for the Parks, this report can and will be used as a progress measurement or report card on the success of the Park Community and the Government in progressing toward those goals. We intend to hold the Legislature accountable for their actions with respect to the State Parks. If you would like to view a copy of this report, go to the CSPF website: calparks.org.

Greater San Diego Science and Engineering Fair
by Sally Whitlock

Judging of the 57th annual Science Fair was completed March 23rd in Balboa Park. Nearly 900 students exhibited 845 projects, about 100 more than last year. Through their involvement in the fair, students have the opportunity to learn analytical skills, the scientific method and the importance of being good consumers.

For our part, the TPDS judges (shown in the photo above) previewed several projects in the morning to make recommendations for further consideration. In the afternoon, after a lively discussion, our judges interviewed selected students to determine award winners. We are proud to report that four projects were chosen. The students will present their projects at the May 14th general meeting and publish articles in the May Torreyana. Many thanks to our judges for a job well-done!

DQOM (Docent Question of the Month) April 2011
Torrey Pine Tiki
by Jim Larrimore

Q. What happens to a Torrey pine if bark beetles kill it?

A. Within TPSNR a dead tree is left “as is” to decay. You can see them especially on the Parry Grove Trail. Outside TPSNR it is a different matter. In February, something special was announced with an 80-year old Torrey pine in Swami’s Park in Cardiff that had fallen victim to a bark beetle infestation in summer 2010. After efforts to save the tree failed, it was cut down January 13, 2011 and an 11-foot tall section of the trunk was left standing. On February 16, the Encinitas City Council decided the stump would be carved into an Easter Island ─ or tiki ─ head, replicating the carvings made famous by the Polynesians between 1250 and 1500 on Easter Island.

They considered that a Torrey pine tiki would be an appropriate piece of art, since the earliest traces of surfing are found in the Polynesian culture and Swami’s Beach is one of America’s most revered spots to ride the waves. Tim Richards, Encinitas resident and woodworking artist, and his son have started to turn the stump into the latest piece of public art in Cardiff. The photo below shows the Torrey pine tiki on March 25th.
His Torrey A through Z: the letter Y
(Ystagua)
by Judy Schulman

You have probably driven over it and didn’t even know that something historically significant was below. You may have waited impatiently at the railroad crossing in Sorrento Valley, and never expected that you were about to enter a sacred area. I am talking about the Kumeyaay village of Ystagua (see map). It was located under the intersection of Highways 5 and 805. Some archeologists feel that it was there as early as 1295 AD. This Northern Diegueno/Ipai Native American site may have been home to up to 1,000 individuals.

I have always thought that Ystagua meant “there are trees there,” but according to the Kumeyaay Place Names Project, it means “the worm’s home.” Mission records often referred to the area as Rancheria de la Nuestra Señora de la Soledad.

The earliest archeological studies of the area occurred in the 1970s. Since then many midden areas have been discovered. Areas of shell and artifacts (lithic tools, ceramics, worked bone) have been found. It is possible that that the area was utilized as a resource for food and raw materials for tools. It also appears that it was a trading site. Artifacts made from Salton Sea area obsidian have been found, as well as ceramic shards from the Luiseño. The area is sacred as human burial sites with cremation remains have been found.

The earliest studies suggested that the natives moved to Poway and the Cuyamaca mountains during the late summer and fall seasons. But more recent studies suggest that the need to migrate was not necessary because of the abundant local availability of food and fresh water. It is reasonable to believe that they would have visited Torrey Pines for hunting and gathering forays. Fishing practices showed preferences for mackerel, albacore, skipjack, bonito and yellowtail. They may have also harvested the local kelp beds.

The village was visited by Gaspar de Portola in 1769 who described the people he found there as friendly. Beads and clothing were traded for fish at their first meeting. Despite having previous contact with soldiers and missionaries, Ystagua inhabitants did not participate in the 1775 revolt against the San Diego Mission. This was also true of other coastal and northern villages.

In 1975, a section referred to as the Rimbach Ranch Site was listed on the National Register of Historic Places. It lists the historic function as domestic and funerary. The historic sub-function is given as graves/burials and village site. □
Peter Torrey passed away at the age of 88 on March 16, 2011. He was related to Dr. John Torrey, for whom the pine was named. He was a Supporting Member from the Docent Class of 2001.

Obituary: SD UT Mar 21, 2011

Celebrate Spring with Museum Shop Offerings by Nancy Woodworth

New Book Titles
- Plant Portraits, the California Legacy of A.R. Valentien

A.R. Valentien, prominent artist of the Arts and Crafts movement, was commissioned by Ellen Browning Scripps in San Diego in the early 1900s to create watercolor paintings of all the native California plants. This monumental work of 1094 original paintings, which took him 10 years to complete, came to the San Diego Natural History Museum in 1893 after Miss Scripps’ death. Commenting on his beautiful and accurate paintings, Albert Valentien said, “I have simply painted what I saw and how I saw it.” (The Torrey pine is featured on page 134.)

- San Diego County Plants by James Lightner new 3rd edition

The latest taxonomy from the Jepson Manual was used as a guide to provide precise plant identification. In this book invasive plants are flagged and sensitive plants recognized by the Habitat Conservation Plans are highlighted. There are 1,300 new color photographs and nearly 3,000 photos total. Note: A photo of TPSNR is on the cover.

- Native Plants, Torrey Pines State Reserve by Margaret Fillius
- Torrey Pines Flower Brochure

Celebrate the season with bunny and chick Brushkins and Finger Puppets.

More to come… Inventory is enhanced with new items frequently.

Torrey Pines Docent Society Bird Survey: March 5, 2011

Total of 81 species

Gadwall 34  Snowy Egret 13  Mourning Dove 5  Black Phoebe 12
Eurasian Wigeon 1  Little Blue Heron 1  Western Sandpiper 12  Say's Phoebe 4
American Wigeon 21  Black-crowned Night-Heron 2  Least Sandpiper 15  Cassin's Kingbird 2
Mallard 10  White-faced Ibis 6  Short-billed/Long-billed Dowitcher 15  Western Scrub-Jay 5
Cinnamon Teal 6  Osprey 1  Ring-billed Gull 6  American Crow 18
Northern Shoveler 34  White-tailed Kite 3  Western Gull 15  Common Raven 18
Northern Pintail 33  Northern Harrier 1  California Gull 18  Northern Rough-winged Swallow 11
Green-winged Teal 22  Cooper's Hawk 1  Royal Tern 1  Tree Swallow 5
Lesser Scaup 5  Red-shouldered Hawk 1  Mourning Dove 5  Cliff Swallow 1
Bufflehead 6  Red-tailed Hawk 3  Greater Roadrunner 1  Bushtit 50
Red-breasted Merganser 3  American Kestrel 3  White-throated Swift 18  Bewick's Wren 4
California Quail 16  Peregrine Falcon 2  Anna's Hummingbird 29  House Wren 8
Common Loon 1  American Coot 59  Rufous/Allen's Hummingbird 5  Marsh Wren 5
Pied-billed Grebe 7  Snowy Plover 15  Hummingbird 3  California Gnatcatcher 5
Double-crested Cormorant 25  Killdeer 3  Belted Kingfisher 1  Ruby-crowned Kinglet 2
Brown Pelican 25  Willet 67  Nuttall's Woodpecker 1  Wrentit 28
Great Blue Heron 1  Whimbrel 1  Northern Flicker 1  House Finch 33
Great Egret 8  Long-billed Curlew 3  Northern Mockingbird 1

Observers: Gary Grantham, Kathy Dickey, Blair Francis, Will Cox, Frank Wong, Nelson Brav, Eva Armi, and Anonymous

Previous Bird Surveys may be found at torreypine.org/activities/bird-sightings.html

Many great bird photos taken at Torrey Pines and elsewhere may be found on the photo site used by Docent Herb Knufken pbase.com/bernrm
The Torrey Pinecone, a calendar of events, notes from business meetings, and other items of specific interest to the docent membership, is published bi-monthly (even months). For odd months we publish the Torreyana. Please submit items by the 20th of the month to the Editor Editors@torreypine.org. This newsletter is edited by Docent Lillian Lachicotte. Items for publication may also be left in the Torreyana mailbox in the docent library.
